

4. As our parishioners use the Great Western Canal for recreation we would urge the retention of a suitable 'margin' between the canal and development and ensure that wildlife pathways are retained through the development to allow and encourage the movement of wildlife which use the canal area and enhance its diversity. This appears to be now being recognised.

5. We would urge strict control over the planning and construction process to ensure that the provision of roads and other infrastructure are provided in suitable phases **ahead** of phased house construction and sale.

Yours sincerely

Tracy Leaman
Parish Clerk
