

104/1759

Norlands Culcompton.

EX 1117 24-1-2014

To the Councillors of Mid Devon District.

Dear Sirs/Mesdames,

You have invited me to comment

on the future development on land east of Tiverton.

First of all who are these houses to be built for?

Young people cannot afford to buy them and

in it people entering the country have no money.

In the local press weekly there are plenty of houses

to be sold or let. It is sacrelodge to build on

the best Agricultural land, taking it out of the

food chain. The land in question is flooded at

times, with more & more houses built the River-doman

could cause trouble to the Town.

The M5 and local roads are grid-locked already

and more houses, bring more cars. Eventually

this will deter visitors coming to Devon and

kill the tourist industry. Our schools are

already over-crowded and Hospitals and

Doctors' surgeries pressed to the limit.

Electricity is in short supply and Solar

1
Panels are unsightly on roofs. Also covering fields, again reducing the supply of food. Mains Water is in short supply during dry weather. Unemployment in the area is high so with little or no Industries where will jobs for all come from. We shall soon become a Third World country unless this mass building is halted.

Enough is Enough.

A politician once said "The E.U want England to become a Play-ground for Europe, Poland to produce the food."

I urge you not to let this happen, let "common sense prevail."

Get the priorities right and think seriously about these issues for future generations.

Do not let our land be desecrated in this way.

Yours Faithfully

O. Marshall.
