Subject: Community Infrastructure Levy consultation

1. Preliminary draft Charging Schedule Consultation Explanatory Notes :

4.6 It should be made clear that the exemption for extensions, conversions and self-build will also extend to rebuilding, i.e. the replacement of substandard housing by a new dwelling up to modern standards.

2. Draft Infrastructure Plan :

Upgrade to wastewater treatment facilities – in the draft shown as “critical” with phasing 2020 to 2025.

An upgrade to the access to the Tiverton Sewage Treatment Works is critical and phasing should be brought forward to 2014 to 2015.

An upgrade to the main sewer itself is critical and should be phased before any major development is commenced in the Tiverton area.

These two matters are critical for every household in the Tiverton area , whose sewage is treated in the Tiverton Sewage Treatment works.
