**Subject:** RE: Mid Devon Green Infrastructure Strategy - Initial Consultation

Dear Liz,

Thanks for including me in this email. I've had a read through the GI plan's proposed vision, objectives and timetable and from a Climate SouthWest perspective I don't have any specific comments to make at this stage. I'm pleased to see that the role of GI in climate change adaptation features strongly as one of the plan's objectives, so I look forward to seeing the detail of this reflected in the strategy as it's developed.

Kind Regards,  
Alex

Click [here](#) to report this email as spam.

Dear All,

I have started work on a Green Infrastructure Strategy for Mid Devon. The Strategy will map existing green infrastructure such as playing fields, allotments, woodland and public rights of way, and will identify deficiencies and opportunities for improvement.

More information about the Council's vision, objectives and timetable for the Green Infrastructure (GI) Strategy can be found on our website at <http://www.middevon.gov.uk/index.aspx?articleid=8128>.
