70/3714

Dear Sirs,

I am responding with my views to the above proposed development.

- I feel it is imperative that the link to the A361 is built in full before the development commences. Should this not be done first then I can foresee serious traffic safety problems due to the heavy traffic involved.
- I would like to see all housing incorporate PV panels into their roofs during construction. This would be much cheaper and neater than any 'add on' retrospective panels fitted at a later date.
- I would be in favour of Option 1 as opposed to Option 2 for the development.

Yours faithfully

David M Cutts
