99/3724

Sirs,

I understand that EUE are recommending that once the road link between the A361 and the new development has been built, all traffic to Tiverton could be routed along the Blundells Road to the Horsdon roundabout.

This will massively increase the hazard of traffic passing through Blundells school, which will be an obvious danger.

I also query how traffic is to get on to Blundells Road from Tidcombe Lane, already a busy road. It is a small junction and would become impossibly choked during rush hours, particularly during the times of school day openings and endings at Blundells and Tidcombe Primary schools, when it is already congested.

Have these aspects really been fully looked into?

Yours faithfully,

(Mrs) A.S. Kyrle-Pope.
Mayfield House,
2, Tidcombe Lane,
Tiverton
