Dear Mr. Williams,

With regards to the recent proposed development around Junction 27 and beyond, may I inform you that I would not be interested in selling any of our property regardless of the amount of money offered.

The holding has been in the family for a very long time & kept in harmony with Nature as much as possible, the hedgerows being equivalent to an 'ancient woodland' environment. There is a great number of oak trees and others in their prime and about one & a half miles of water ditches. Also a long stretch of undisturbed wooded riverside also with many large trees, undergrowth & the corresponding wild life.

It has all been under the stewardship scheme & 'Natural England' since 2000.

Yours sincerely  
K Bass
