Subject: ref possible site plan off honiton road cullompton

Dear sir

I would like say about development to this site that it is on three sides flood plain, 33000 power lines though the site and a large amount of surface water already running down the Honiton road. flooding housing entrances to the south of Honiton road, we feel this is not wise in view of traffic flow problems to j28 m5 junction (in need of improvement) and access dangers
Are things to be considered
