Subject: Copplestone proposed sites for development- objection

We are writing to strongly oppose any further development of copplestone, having seen 3 proposed sites put forward on your website. This is a village without the need for any further development as there is no infrastructure to support any further housing, schools, village hall, etc. Also we have an extremely busy road now without the addition of 216 + more likely two cars per household on already over used roads. We ourselves live by the Salix stream & have in the last 2 years been flooded with no doubt the main reason being water from developed area of dulings meadow above us being partly to blame, further building above this site would only add to our problems & neighbouring properties. The last 10 years has seen the village expand by 60% & we feel that is enough. Where will all the people come from to fill these houses & more importantly where would they work as local employment is extremely low. It is without doubt a much better idea to build a new community for all these apparent housing needs!, instead of over stretching small villages.

Once again please note we are strongly opposed to any further housing developments within copplestone.
