Subject: Forward planning

Dear Sirs

I am writing in response to the prospect of a proposed development of 51 houses to be built on greenfield site both sides of Bowdens Lane.

Reasons for our objections are listed below.

Transport- Big cement mixers And the like plus 100 cars minimum, and that is without fire engines and ambulances ect,ect.

Education- No School amenities all children having to be taken by bus or car.

Doctors- Surgery has already reached it's capacity.

Parking- In Bampton double parking is already a big problem for lorries and buses.

Sewage- I am informed that without improvements to the system it will not cope with the increase.

Capacity- a 68% increase is a lot more than 20% which is the limit set I am told.

Brown sites- there are brown sites all over the county ie-empty warehousing and shops ect,utilize these sites first, which are covered in concrete already

It's just a money making scheme nothing to do with what is needed.
