Subject: Proposed development in Silverton

9 Exeter Rd, Silverton. EX5 4HX
19.03.2014

Dear Sir or Madam:

I wish to add my voice to the concerns of villagers in Silverton to the proposed new housing developments in the village. If the allocated sites are developed, the impact on the environment of the village will be extremely damaging. I am thinking in particular of the increased road traffic, the reduction of the already limited pedestrian walkways and the destruction of hedges and green areas. I am not at all opposed to the provision of affordable housing in the village, but this could surely be achieved without going beyond existing settlement limits. A more feasible option (2B) of the current plan is the proposal for a new settlement near to junction 28 of the M5, which has the backing of the Cullompton Town Council, and which seems to me the most sensible way forward.

Yours sincerely,

Alan Robertshaw.
