**Subject:** Planning junction 27 ,M5 business park .Opposition

**Mid Devon Council Planning Consultations.**

It has been brought to my attention that there is a plan to develop land at Junction 27 of the M5 by developers .

I would strenuously oppose that sort of application for the following reasons.

There is no request , need ,from anyone living around here for such a development . So the application is for pure greed of what developer might get out of it.

It will take up valuable land used for crops, and animal rearing. Cause greater traffic congestion on the junction .

If the application includes the building of houses , then the very people who live in them eventually should support the shops locally in Uffculme, Willand and Tiverton. If they don't,

It will **blight** shops and businesses in the area.The towns of Tiverton and Cullompton struggle now to make ends meet. Tiverton has a business park . We do not need another one.

I moved here like many others to live in the countryside. If I need anything major I will go to Tiverton or Exeter.

Exeter is now nothing more than a shopping centre with business parks all around it. Fine if you want something but the whole area is now blighted in terms of ambience.

The countryside around Uffculme is beautiful. The population here love it. We want the peace of it. So why even consider building on it.
