Subject: Proposed developments at Silverton

I wish to oppose most strongly the proposals recently advertised. Any further development in the village would impact greatly on the character and heritage of the village to say nothing of the huge impact these would have on the infra-structure and health and education provision. They would in any case be in total variance with the limit plan updated as recently as 2011. Two areas are located in the conservation area which makes nonsense of this designation.

I am sure that the most sensible plan would be Option 2, a new settlement close to the M5 and Cullompton.
