To whom it may concern.

I wish to raise my objection to the proposed new town and Industrial area at junction 27. Why are we considering building new when the towns of Cullompton, Wellington, Crediton and Tiverton are so under invested.

All these town centres are run down. They have empty shops with empty homes above these shops. We let the egg farm in Willand build new warehouse space (which is still to let) when the space at the four cross way's roundabout is half empty.

The four cross way development was allowed when there are warehouses in south view that have been empty for the best part of ten years.

Why concrete over more green fields when we have no where near filled what we have.

Yours Sincerely

Paul Witt
