**1. Do you agree with the Vision and Spatial Strategy?**

Yes

**2. Draft Policies S1 and S2 set out the Council's approach and priorities for sustainable development. What is your opinion about these policies?**

Support

1. Policy S3 includes two options for the distribution of development over the plan period (2013-2033). The first option is to continue focusing development in the three main towns according to their current sizes and roles. The second option is to provide for long-term growth (post-2026) in a new community. A separate question deals with the location of a new community, but please indicate your opinion in principle below. Which option do you prefer and are there alternative options we should consider?

Option 1 Continue to focus most development in the towns up to 2033

**2. If the Council chooses to pursue Option 2 under Policy S3 (the new community option), which location would you prefer and why?**

Option 2(a) - Land at Junction 27 and adjoining Willand

1. Policies S4-S6 are strategic housing policies setting out a potential target for annual rates of housing across the district, the proportion to be affordable and adaptable, the amount of public open space to be provided, and the Council's approach to ensuring housing delivery. Do you support these policies or have suggestions on how they could be improved?

Support

2. Economy and infrastructure policies are set out in Policies S7-S9 of the options document. These propose 154,000 square metres of commercial floorspace (including retailing) over the plan period (2013-2033) and set out the Council's approach to town centres and infrastructure delivery. Do you support these policies or have suggestions about how they could be improved?

Support

1. Policy S10 seeks to sustain the quality of Mid Devon's environmental assets and minimise the effects of development on climate change. Do you support this policy and do you have suggestions about how it could be improved?

Support

2. Policies S11-S15 set out strategic policies for the towns, villages and countryside, including expected annual rates of development for the towns which can vary depending on the options discussed under Policy S3 (amount and distribution of development). Do you support these policies and do you have suggestions about how they can be improved?

Support

1. The Site Allocations section of the Local Plan Review options document includes numerous options for development sites in the towns and villages. These exceed the amount of development likely to be required, but the Council wishes properly to consider all the available sites before making decisions on which are most appropriate. Please tell us your opinion on specific sites in this chapter of the plan, continuing on a separate sheet if necessary. Providing detailed reasons for any objections will help us evaluate and compare the suitability of different options.

There should be more affordable housing within villages, especially Chawleigh. We have lost our village school and at this moment in time we have more primary aged school children in the village than we have had over the past 8 years. We have lost our village post office and most of the houses that do come up for sale are completely out of the price range of first time buyers and/or young people. Chawleigh needs housing for young local people to keep the village 'alive' otherwise it will just become a place for elderly, wealthy, retired people. I have two daughters who both work locally - one at the Health Centre in at Chulmleigh and the other as a home care worker, both doing valuable jobs for the local community. They would both like to be able to afford to live in the village where they grew up but there is very little rental properties and what does come on the market is very expensive and there is no way they could afford to buy a

house unless it was an affordable house or on a part buy/part rent basis. If there was housing available for them in Chawleigh it would mean that they could carry on living and working locally - reducing their carbon foot print and with the daughter that is a home care support worker - she would be here in the village should there be bad weather to be able to support those that rely on her for support/care.

---

**2. The Council adopted its Development Management Local Plan (LP3) in October 2013. This plan is included in the options consultation without modification, but pages 102-107 explain where amendments or new policies are being considered. Do you have anything to say about the amendments or new policies being considered, or comments about the existing adopted policies included within the consultation document?**
