**1. Do you agree with the Vision and Spatial Strategy?**

Not sure

**2. Draft Policies S1 and S2 set out the Council's approach and priorities for sustainable development. What is your opinion about these policies?**

Object

1. Policy S3 includes two options for the distribution of development over the plan period (2013-2033). The first option is to continue focusing development in the three main towns according to their current sizes and roles. The second option is to provide for long-term growth (post-2026) in a new community. A separate question deals with the location of a new community, but please indicate your opinion in principle below. Which option do you prefer and are there alternative options we should consider?

Option 2: Focus development after 2026 in a new community

**2. If the Council chooses to pursue Option 2 under Policy S3 (the new community option), which location would you prefer and why?**

Option 2(a) - Land at Junction 27 and adjoining Willand

Option 2(b) - East Cullompton (east of Junction 28)

Highways infrastructure already exist

1. Policies S4-S6 are strategic housing policies setting out a potential target for annual rates of housing across the district, the proportion to be affordable and adaptable, the amount of public open space to be provided, and the Council's approach to ensuring housing delivery. Do you support these policies or have suggestions on how they could be improved?

No Response

2. Economy and infrastructure policies are set out in Policies S7-S9 of the options document. These propose 154,000 square metres of commercial floorspace (including retailing) over the plan period (2013-2033) and set out the Council's approach to town centres and infrastructure delivery. Do you support these policies or have suggestions about how they could be improved?

No Response

1. Policy S10 seeks to sustain the quality of Mid Devon's environmental assets and minimise the effects of development on climate change. Do you support this policy and do you have suggestions about how it could be improved?

No Response

2. Policies S11-S15 set out strategic policies for the towns, villages and countryside, including expected annual rates of development for the towns which can vary depending on the options discussed under Policy S3 (amount and distribution of development). Do you support these policies and do you have suggestions about how they can be improved?

No Response

1. The Site Allocations section of the Local Plan Review options document includes numerous options for development sites in the towns and villages. These exceed the amount of development likely to be required, but the Council wishes properly to consider all the available sites before making decisions on which are most appropriate. Please tell us your opinion on specific sites in this chapter of the plan, continuing on a separate sheet if necessary. Providing detailed reasons for any objections will help us evaluate and compare the suitability of different options.

Regarding development in Culmslock. Object on grounds of visual impact in area of outstanding beauty. Infrastructure in village of increased traffic making narrow road unsafe, plus damage to existing buildings and street furniture. Existing poor sewage system that struggles to cope over bank holidays and heavy rain when drains become full and overflow into

river causing pollution and endangering wildlife Flooding due to run off which is already an on going problem for some properties and the roads within the village

---

**2. The Council adopted its Development Management Local Plan (LP3) in October 2013. This plan is included in the options consultation without modification, but pages 102-107 explain where amendments or new policies are being considered. Do you have anything to say about the amendments or new policies being considered, or comments about the existing adopted policies included within the consultation document?**

Response to MDDC Local Plan Review

Date 23<sup>RD</sup> March 2014

Dear Planning Department

Further to the Parish Council's earlier objection, we write to outline specific concerns brought to the attention of the Parish Council by parishioners along with a list of parishioner's signatures supporting their comments and the original objection.

In particular the majority of objections we have received span the three option sites you have outlined for the village of Culmstock, these being the Linhay 3<sup>rd</sup> Phase, Highfield's and the Glebe / Rackfield's land.

- The MDDC local plan review options involves development of land currently outside the settlement limit and to this end MDDC have not demonstrated that the settlement limit change proposal provides a substantial public benefit in accordance with the requirements of the National planning policy framework DM27
- It is anticipated that the building of an additional 50 houses across three sites, as you have outlined will add at least 75-100 cars using the road infrastructure in and around the village, The road system in Culmstock is already fit to bursting point with HGV lorries using our village as a to and from the quarries, commuters from surrounding villages and towns doing the same and in some cases HGV'S using the village as a rat-run to link the A303 to the M5, in the middle of our village we have a listed bridge of extreme historic importance, during

the last few years this bridge has been damaged / repaired numerous times and at substantial cost!

- Particularly, access to the Highfield's site has to pass a local primary schools and the village playing fields entrance and the potential for an incident here is only increase by further development, likewise there is no current road infrastructure suitable for the development option at the Glebe and Rackfield's, this site also suffers from dangerous corners to both sides increasing the danger and likelihood of traffic accidents, there is also no foot path on the Uffculme road and no potential to install one.
- Of the three sites chosen, two of the sites that MDDC propose to build on fields that sit above the village on two sides, Culmstock already suffers from water run- off and our drainage system is already insufficient and cannot cope, refer to flooding issues in 2012 and 2013, by building properties here and increasing the water run- off will only make these matters worse and potentially increase the flood risk lower in the village.
- Culmstock has a poor waste drainage system, in recent years, again refer to floods in 2012 & 2013 raw sewage has been back forced into houses at the lowest point in the village because our system is insufficient, adding additional houses will simply impact this situation.
- Our village primary school is full, adding additional properties will result in children being turned away by the school and/or additional infrastructure being required at the school to increase class sizes; this can only have a detrimental effect on the teaching standards provided.
- The Culmstock church is an important, historic heritage asset for the community with its literal links and well published tree growing from the tower and set within a conservation area. The proposed Glebe and Rackfields land sits to the back of the Church and as such the ridge line of a standard house will be above the height of the Church tower adversely changing the views of the village from the Culmstock beacon and surrounding Blackdown hills within the AONB.
- Due to the historical relevance of the houses in the conservation area around the Church, all the properties along Fore Street (these all back onto the Glebe and Rackfields land) have house wells, so by building on land approximately 40/50 feet above Fore Street, MDDC run the risk of increasing the height of the water table, thus increasing the possibility for internal flooding or problems associated with the water level.
- Generally if the option sites become adopted there will be a huge loss of green fields surrounding the village and with that a loss of flora or fauna will have an adverse effect of lots of bird and animal life.

The points raised here are a true reflection of the feeling of the parishioners within the village and as such hope that sensitivity and common sense will prevail when further investigation of the outlined sites suitability comes under question at the next stage.

Yours Sincerely

*D. Harris*

David Harris

Chairman – Culmstock Parish Council

## Local Plan Review for Culmstock

I have attended the Culmstock Parish Meeting on 18th March 2014 to voice my objections/agreement with the proposed building developments for Culmstock within the MDDC Local plan.
