Hartnoll Farm Development

I object to the proposed development at Hartnoll Farm for the following reasons :-

The proposed enlargement of Tiverton is being planned in a piecemeal manner.

There is no justification for such a huge increase in the population which will result in an urban sprawl.

The Development of this area has previously been rejected, one of the reasons being the inadequacy of the road system. The loss of top grade agricultural land also rules out it's use.

The addition of a development on this site to the proposed E.U.E. would create even worse traffic chaos through Halberton and the Blundells road and school.

There are far better locations for development such as Junction 27 which could be properly planned and laid out without ruining the lives of the local community.
