**Subject:** Cheriton Fitzpaine - Local Plan Review

To whom it may concern,

I am writing this email regarding the houses that are planned to be built in Cheriton Fitzpaine and the proposed sites.

I understand the need for housing for local people but the amount that is being suggested is ridiculous as the roads would not be able to cope with the traffic, the drainage and water supply's are not up to it and the pollution that will get caused is unnecessary. It will also have a damaging affect to the wildlife that live in the sites.

If you are going to build my preferred site would be the Site 3 at Barnhill Close which is already set up for building on and is already in a built area.

My least preferred, which I would be most objectionable to are the sites at Whitecross. This is site 2 Adj to the primary school and site 4 landboat farm. This is as it would have the most negative impact on my environment & this will start to eat into the countryside that is around our village. So, these should be areas that are protected to ensure we do not end up living in an area with limited fields and also limited birds and wildlife which is inevitable if their habitats are taking away.

Yours sincerely,

Mark
