To whom it may concern

We write to say that following the meeting held in St. Mary's Church, Silverton on 25th February, together with the public notices re planning proposals, we understand that there is an intention to build a number of properties in Silverton in the next 10 years.

We fully realise the necessity for some affordable houses that local people could purchase - maybe young couples just starting out or older people downsizing, but we are very much against the prospect of any large estates that would change the community of the village, which currently is a vibrant and cohesive one.

Therefore we want to register our objection to any building that exceeds something in the region of another 20 properties.

We are:
