Dear Sirs

While we all understand the need for added housing can we please ensure that great importance is placed on TRUE affordable homes for those already living in the villages and who have children attending the local schools. So far, from what I have seen 'affordable housing' is very much still out of the majority of families reach both financially and in the numbers of homes supplied and this needs to be rectified if we are to provide stability for our local communities.

Kindest regards

Christine and Keith Thomas
