Subject: planning proposals in Silverton

further to the public meeting held in the Church in Silverton, I wish to register my comments.

The sites suggested in Old Butterleigh road would result in loss of allotments and therefore food and recreational activity. They would also create excess traffic in the already congested high street.

The village is a commuter village as there is little work within the actual village. This means that there will be an increase in the number of cars using the small village access roads.

However I do think that development next to Hederman close would be possible and would not pose as many problems in terms of traffic as vehicles will be away from the centre of the village
