Subject: Proposed J27 development

Just a few thoughts on the proposed development at junction 27 of the M5 motorway.....
I,m a little concerned that the above development proposal may not adequately address ensuing problems with local infrastructure -

e.g. roads, sewerage, schools (primary and secondary – all are presently at maximum capacity), medical facilities (doctors surgeries, health centre, dentists), public transport etc. etc.

The proposed leisure complex is possibly more suitable for a city or large urban area, will it become under used and be a “white elephant”?

The above development whilst a good idea in some respects does require a lot of further thought.
