Subject: Landscape Implications of Solar PV Proposals

Follow Up Flag: Follow up
Flag Status: Completed

Having attempted to look at the associated documents... and summary would be most helpful for those of us with limited time to look at such documents.

Overall... I would hope the proposal would result in a drastic tightening up of planning legislation. There are already far too many PV sites in Devon and they are a horrendous blot on the landscape. Calling something a "farm" does not make it a farm! These are industrial sites and should be treated as such. A far more rigorous planning process is long overdue.

Yours sincerely, Edward Hobbs
