Subject: Refuse Storage for New Residential Properties - SPD

Dear Sir/Madam

Network Rail has been consulted on the Refuse Storage for new Residential Properties - SPD. Thank you for providing us with this opportunity to comment on this Planning Policy document. This email forms the basis of our response to this consultation request.

Network Rail is a statutory undertaker responsible for maintaining and operating the country's railway infrastructure and associated estate. Network Rail owns, operates, maintains and develops the main rail network. This includes the railway tracks, stations, signalling systems, bridges, tunnels, level crossings and viaducts. The preparation of development plan policy is important in relation to the protection and enhancement of Network Rail's infrastructure. In this regard, please find our comments below.

Soakaways, as a means of storm/surface water disposal must not be constructed near/within 20 metres of Network Rail's boundary or at any point which could adversely affect the stability of Network Rail's property. Storm/surface water must not be discharged into Network Rail's property or into Network Rail's culverts or drains. Suitable drainage or other works must be provided and maintained by the Developer to prevent surface water flows or run-off onto Network Rail's property. Proper provision must be made to accept and continue drainage discharging from Network Rail's property. Suitable foul drainage must be provided separate from Network Rail's existing drainage. Once water enters a pipe it becomes a controlled source and as such no water should be discharged in the direction of the railway.

Any surface water run-off from the site must drain away from the railway boundary and must NOT drain in the direction of the railway as this could import a risk of flooding and / or pollution onto Network Rail land.

Regards,

Barbara Morgan
