To whom it may concern,

REF: Case number 3378579

I am writing in support of Mr Dean Aggett, whom I have know in various capacities since around 2009.

My first meeting with Mr Aggett was at Meadow Forge, when my then partner [REDACTED] [REDACTED] working for him at the forge, this was in a semi formal manner being my partner's boss. We had various discussions over the work they did and soon developed a deeper connection through many conversations regarding our mutual passion and interest in classic vehicles. These conversations were triggered from his impressive collection of vehicles outside the forge, which I soon learned this was his home he had built for himself. This led to a deeper connection of interests, such as the environment, sustainability, off grid living, camper vans and [REDACTED]

Over the years I have visited Dean for various reasons, as a customer and as a friend, this has been at various time of day, morning, afternoon and evening and different times of year. I have never known Dean to live anywhere else in all these years, this is his home. I have always admired Dean for living in and maintaining his home and land in a sustainable manner.

I am deeply saddened by the distress Mr Aggett has been put through with this situation and hope this can be resolved promptly for him to carry on living his calm, peaceful and considerate life in him home.

Please do feel free to get in touch for anymore information, I am more than happy to help.

Kind Regards

Kim Fitzpatrick
