Subject: Cullompton NW Extension - Comments

Would you please note my comments below in regard to the first consultation on the Cullompton NW Urban Extension.

General Comments

The provision of 1100 homes in Cullompton will potentially increase the population by over 10%. I see nothing in the plan that mentions additional doctors or dentist surgeries - both these facilities are currently overloaded. How will this be addressed.

Although a new link road is welcomed what additional works will be carried out to alleviate the already overloaded Station Road and Junction 28?????

Specific Comment

The location of the new school would best be placed as per Option 3 - On Rull Hill.
